GAP10 GAS ALARM CONTROL PANEL

• 8 pieces gas alarm detector (4-10 Ma output) can be connected.

• 2 pieces tank level switch can be connected.

• There are 8 different timers for gas alarm detectors.

• For each tank level sensor, there are 2 different high and low level timers.

• There are 2 different language option: English and Turkish

• Gas alarm detector and tank level sensor can be changed active and passive condition separately.

• 128x64 grafic LCD display. (Tank occupancy rate can be displayed visually.)

• Signal error can be displayed by the screen.

Size : (G x D x Y) 144 x 135 x 144 mm
Weight : 0.60 kg
User Interface : 128*64 Blue-White Grafic LCD –display
Rotating Set Switch
Button Switches

Environmental Working Conditions

Working Temperature Range : -10 ^{o}C - 40 ^{o}C
Humidity : %30 - %75
Voltage : 230V AC
Frequency : 50Hz/60Hz
Suggested Protection Fuse-box : 2A B type Automat Fuse-box
Output Power : 4 W
Signal Input and Type : 8 pieces 4-20mA,
2 pieces 1-5VDC
Dedector Supply Voltage : 12V DC
Tank Level Supply Voltage : 5 VDC
Compatible Detectors : 4-20mA output current,
All detectors which gives 1-5
VDC output tension
Control Output and Control Type : 8 pieces, Max. 5A/250
